640

free HPV vaccines administered and 640 girls protected from cervical cancer for life

35

women diagnosed with early stage cancer and started on treatment

Cumulative program data as on 31st August 2026

CSR Universe Social Impact Awards 2026

Winner, Health category

Bharat CSR & Sustainability Awards 2026

Award recipient

WHY THIS CAUSE

Early detection is one of the highest-return investments in health

India's cancer burden, in numbers

1 in 9

Indians is likely to develop cancer in their lifetime.

15.7 lakh

new cancer cases projected in India for 2025, and rising every year.

28.8%

of all cancers in Indian women are breast cancer. Cervical cancer is second.

0–9%

India's participation band for HPV-based cervical screening among women aged 30–49 (WHO, 2026).

Sources: ICMR–National Cancer Registry Programme, Indian Journal of Medical Research (2022 estimates, 2025 projection); WHO Global Status Report on Cancer 2026, via ORF.

Breast, cervical and oral cancers can be found early with simple, low-cost tests, and cervical cancer can largely be prevented by HPV vaccination. Most women are never offered them.

WHO WE ARE

Kalpavriksham began in 2011 with a medical student, a few thousand rupees and a three-year-old child who needed heart surgery. **Dr. M. Banupriya**, then in her third year of MBBS at Government Medical College, Thoothukudi, raised the money for the child's surgery. That child is a healthy teenager today, and the Trust she founded has grown to touch thousands of lives.

Since then Dr. Banupriya has trained as a radiation oncologist, and the Trust has moved its focus to **solving the cancer crisis** through prevention and early diagnosis. Today it is led by practising oncologists and works to protect the community from the pain of a cancer diagnosis and its financial toxicity.

Our work covers the whole journey: cancer awareness, free HPV vaccination, free screening with mammography, iBreastExam and Pap/HPV tests, referral of positive cases to nearby cancer treatment centres and follow-up to ensure they get the care they need, affordable treatment and palliative care, and free paramedical training for underprivileged girls.

VISION

To uplift society, alleviate pain and suffering from cancer, making a positive difference in the community we live in.

MISSION

To conduct free medical camps, provide essential medicines to rural and urban downtrodden communities, create awareness, conduct cancer screening camps, support curative cancer treatment and palliative care. To provide financial aid for medical, educational, and occupational needs of underprivileged individuals.

One continuum of care, from the village hall to the treatment table

Many screening drives stop at the test. Ours follows each person through to a diagnosis and a treatment decision. That is where the lives are saved.

1 · Aware > Tamil-language sessions on risk, symptoms and self-examination	2 · Screen > Clinical exam, Mammogram, iBreastExam, Pap / HPV DNA, oral & skin checks	3 · Detect > Oncologist review of every abnormal finding	4 · Refer > Structured referral to government and partner hospitals	5 · Follow up Tracking until diagnosis and treatment begin
---	--	---	--	--

FLAGSHIP · SCREENING

Femicare+

Multi-cancer screening camps for women (breast, cervical, oral, skin and genital cancers) held in villages, institutions, colleges and workplaces. Each camp serves 30–50 women and includes vitals, BMI, diet advice and one-to-one breast self-examination training.

TECHNOLOGY

ARISE

AI-enabled breast screening with **iBreastExam**, an FDA-cleared (510(k)), handheld and radiation-free device. It lets our teams screen breasts reliably in field settings that have no mammography.

PREVENTION

Nila: HPV vaccination

HPV vaccination and awareness for adolescent girls and boys, protecting them against cervical and other HPV-related cancers. **640 vaccinations** delivered to date through schools and communities.

AWARENESS

Shakthi

Community education in Tamil on tobacco and areca-nut use, oral self-examination, breast and cervical cancer, and how to use government health schemes. It builds demand for screening in rural Tamil Nadu.

PATIENT SUPPORT

Karunai

Compassionate support for people facing cancer: treatment support, palliative care and occupational rehabilitation for those with nowhere else to turn.

LIVELIHOODS

Shishya

Free paramedical training for girls from underprivileged families. It builds the health workforce that screening programmes need and gives young women a path to skilled employment.

CSR PARTNERSHIP · SCREENING

SunKalp

A comprehensive cancer screening drive in Mathuranthakam block, Chengalpattu District, working to screen 10,000 beneficiaries for breast, cervical, oral, skin and genital cancers.

COMING NEXT

Mobile Cancer Screening Bus

A fully equipped screening unit with digital mammography, colposcopy and Pap-smear facilities, bringing hospital-grade screening to villages and industrial belts that have none. Kalpavriksham is contributing the vehicle.

SunKalp: Femicare+ in Mathuranthakam Block

Under a CSR partnership with **Sun Pharma**, Kalpavriksham runs a block-wide multi-cancer screening programme in Mathuranthakam, Chengalpattu District. Field teams hold camps daily village by village. Women who screen positive are referred to **Kanchipuram Regional Cancer Centre** and **Karpaga Vinayaga Medical College** for diagnosis and treatment, which ties the programme into the government health system.

10,000

women targeted for screening in one block by March 2027

5 cancers

breast, cervical, oral, skin and genital, screened at every camp

PHC

Integration for regular camps in coordination with District Health Administration of Chengalpattu

1 record

per woman, with 87 data fields, from registration to follow-up

BUILT FOR AUDIT

Every rupee and every woman, accounted for

- **Standardised operations.** A 108-page SOP manual with 92 standard operating procedures covering every camp station, from registration and sample handling to biomedical waste and referral.
- **Individual-level data.** An 87-field digital record for every beneficiary covering demographics, risk factors, comorbidities, findings and referral status.
- **Closed-loop referrals.** Numbered triplicate referral forms, with each screen-positive tracked until care begins.
- **Daily camp reporting** that rolls up into the partner's monthly progress reports.
- **Annual Reports** of the Trust's activities every year, with annual reports published on website.

What our CSR partners receive

REPORT	CONTENTS
Monthly progress	Camps held, awareness programs conducted, women screened, tests, positives and referrals, with patient treatment numbers
Quarterly review	Outcomes, follow-up status, field photographs and beneficiary stories
Utilisation certificate	Fund utilisation against the agreed budget, for your CSR filings
Annual impact report	Programme outcomes, learnings and a case for continuation

Reporting formats can be aligned to your company's CSR policy, board committee and BRSR requirements.

“

Today I had my breast examination with Kalpavriksham Trust. The team was very kind, and the sisters clearly explained how to do breast self-examination. It is very useful to me.”

Vinothini, camp beneficiary

“

My daughter received the HPV vaccine. The doctor explained how it will protect her from cancers in future. I request all parents to gift this vaccine to their children.”

Sandhya, Parent, Nila HPV vaccination programme

Compliance-aligned, flexible, and built around your priorities

SCHEDULE VII, COMPANIES ACT 2013	OUR PROGRAMMES	SDG ALIGNMENT
Item (i) Promoting health care, including preventive health care	Femicare+ · ARISE · Nila · Shakthi · Karunai · SunKalp · Screening Bus	SDG 3 Good health & well-being (target 3.4, NCDs)
Item (ii) Employment-enhancing vocational skills, especially among women	Shishya	SDG 4 · SDG 8 Skills & decent work
Item (iii) Promoting gender equality and empowering women	Women-centred screening, HPV vaccination, training for girls	SDG 5 Gender equality

01

Sponsor a screening camp series

BEST FOR: FIRST-TIME PARTNERS

Femicare+ and ARISE camps in the communities around your plants, offices or supply chain. A clear cost per camp and per woman screened, with results reported within weeks.

02

Adopt a block or district

BEST FOR: MULTI-YEAR FLAGSHIP CSR

A SunKalp-style programme that screens thousands of women across a whole block, linked to government referral hospitals. It gives measurable population-level impact under your brand.

03

Protect a generation

BEST FOR: PREVENTION & EDUCATION FOCUS

Nila HPV vaccination for adolescents in partner schools and communities, with awareness sessions for parents and teachers.

04

Co-fund the Screening Bus

BEST FOR: SIGNATURE CAPITAL PROJECT

Fund mammography, colposcopy and operations for our mobile unit. It is a visible, long-life asset with naming rights and a fixed route through underserved areas.

05

Diagnostic Pathway Fund

BEST FOR: OUTCOME-FOCUSED FUNDERS

Pays for biopsies, imaging and specialist review for women who screen positive, so that no early detection is lost for want of money.

06

Skill a girl

BEST FOR: WOMEN'S LIVELIHOOD MANDATES

Sponsor Shishya paramedical training for girls from low-income families, leading to jobs in healthcare.

What your company gains

- ✓ **Board-ready impact:** hard numbers on women screened, cancers found and referrals completed
- ✓ **Compliance comfort:** CSR-1 registered, 12AB/80G, audited accounts, documentation for your CSR filings
- ✓ **Employee engagement:** volunteering at camps and awareness talks for your teams
- ✓ **Visibility with dignity:** co-branded awareness material, camp banners, stories and site visits

OUR CSR PARTNERS

Trusted by companies that invest in health

These organisations have partnered with Kalpavriksham Trust through their CSR programmes to fund cancer awareness, screening, prevention and patient support in Tamil Nadu.

GOVERNANCE & LEADERSHIP

Led by oncologists. Run with discipline.
